Tucker Jenkins - Director

Quality Assurance

Services Limited

CAMO/AMO Independent Compliance Monitoring

Providing assurance of compliance within Part CAMO or Part 145 maintenance organisations is an essential part of modern aviation. Aside from being a regulatory requirement, this is crucial element of all aviation operations in providing a safe and sustainable business.

Compliance with regulation and conformance with standards form a fundamental element of an effective Safety Management system. As an auditor of 25+ years I am able to provide both independent oversight and audit of an organisations own quality assurance systems and performance, as well as a full oversight and audit of Continuing Airworthiness Management and Maintenance processes and procedures.

In addition, I can provide development and review of your Continuing Airworthiness Management Exposition and/or Maintenance Organisation Exposition, including implementation of SMS requirements from EASA Commission Implementing Regulation (EU) 2021/1963, as well as development of procedures and process bespoke to your operation.

Contact me today to discuss your needs and requirements.
